Ex Parte

Re: ET Docket No. 92-9
GEN Docket No. 90-314

Dear Ms. Searcy:

This is to notify you, pursuant to Section 1.1206(a)(2) of the Commission's Rules, that representatives of the Utilities Telecommunications Council (UTC) met this morning with the Deputy Chief Engineer, of the Office of Engineering and Technology, and his staff to discuss several issues in the above-referenced dockets.

UTC reviewed the positions UTC has advanced in its written Comments and Reply Comments in these dockets, including support for a non-commercial allocation of emerging technology spectrum in the 2 GHz band.

UTC also noted its strong objection to a May 12, 1993, written ex parte presentation of Motorola Inc. in this docket in which Motorola argued that additional spectrum for Mobile Satellite Systems (MSS), such as the Motorola Iridium System, should be allocated from the 1970-2010 and 2160-2200 MHz bands. UTC pointed out that most of this spectrum is currently allocated for use in Private Microwave Systems, and that the policies just adopted in this docket would require any new users of this spectrum to protect incumbent operations or guarantee all replacement costs and the reliability of any replacement systems. UTC noted its particular exception to Motorola's conclusion that it "does not appear to be economically feasible for MSS providers to pay to clear [this 2 GHz] spectrum." UTC requested confirmation that the Commission will apply the policies adopted in this docket to any and all new services that might be allocated in the 2 GHz band.
